SUMMARY OF THE CLASSIFICATION	13
NUMERIC INDEX	1

THE CANADIAN INTERNATIONAL TRADE CLASSIFICATION

CLASS LISTING IN NUMERIC ORDER

This reference manual is a listing in numeric sequence of codes designed to be used by importers and their agents in conjunction with the Canadian International Trade Classification (CITC) Commodity Index released in 1972. The Commodity Index is an alphabetic listing of the descriptions of all commodities imported (or exported) by Canada. Many of the 44,000 descriptions in the Commodity Index are covered by the same commodity code, in the approximate ratio of three to one. This present volume lists only the CITC classes (commodity codes) in numeric sequence.

There are two main reasons for producing the CITC in 7-digit numeric class order. First, the numeric order enables users to understand better the structure of the CITC, and this is essential to the successful application of the commodity code on the B3 Canada Customs Import Entry Coding Form. Second, since all the commodity codes for goods of like kind are arranged sequentially, users should find more easily the ones which pertain to the commodity area of the goods being cleared.

THE STRUCTURE OF THE COMMODITY CODE

The CITC is structured so that every commodity in trade may be assigned its unique commodity code. The first two digits of the code indicate a broad breakdown into the seven sections of the CITC as follows:

1. Live animals — 00
2. Food, feed, beverages and tobacco — 01 to 18
3. Crude materials, inedible — 20 to 29
4. Fabricated materials, inedible — 30 to 49
5. End products, inedible — 50 to 96
6. Special transactions — trade — 97
7. Special transactions — non trade — 99

An explanation of the seven sections of the Import Commodity Classification (MCC) from which the CITC is derived may be found on page VI of the Introduction to the Commodity Index-Alphabetic.

The third digit of the commodity code identifies groups of similar items in a fairly specific manner. Altogether there are 365 groups, listed as shown in the Summary of the Classification which begins on page 13. Once the first three digits of the commodity code have been found in this Summary, turn to the page in the numeric listing indicated beside it and determine the full seven digits of the commodity code.

HOW TO FIND A COMMODITY CODE

This process may best be illustrated by example. Suppose the item to be coded is a consignment of baked ham. We know that it falls in Section 2 — “Food, feed,

beverages and tobacco”, from the table shown above. Therefore, the first two digits will be between 01 and 18.

In the Summary of the Classification, under the heading “Meat and meat preparations”, the following groups are listed:

- 011 Meat, fresh, chilled or frozen
- 013 Meat, cured
- 015 Ready-cooked meat and meat preparations, not canned
- 017 Meat and meat preparations, canned (except infant foods)

Since baked ham is a ready-cooked meat, not canned, the first three digits are 015. We may now refer to the 015 series in the numeric listing. The key-word principle is used as in the alphabetic “Commodity Index”. Accordingly we look for “hams, baked, not canned”. There is a description which reads “hams, cooked, not canned”, and since baking is a form of cooking, we can use the appropriate commodity code, which in this case is 015-99-40. The unit of measure code which is also shown is, in this example, 52 for pounds, and the weight in pounds is taken from the invoice.

One of the common errors made in the selection of a commodity code is to choose the code for a piece of complete equipment when the item to be coded consists of parts. Consider the following two descriptions and codes:

Description	Code
Furnace, processing of metals, n.e.s.	505-09-70
Furnace, processing of metals, n.e.s., parts of	505-09-78

While the only difference between the two descriptions lies in the words “parts of”, it is an important difference, and a separate commodity code must be reported.

One point to bear in mind when coding is that it is almost impossible to list every item in trade by its specific name. For example, while there are many different kinds of flight simulators imported into Canada, they are not itemised by individual name. For them you will find only the generic description “flight simulator” with commodity code 709-97-51.

Another point is the significance of n.e.s. In the example of furnaces above, the fact that the description reads “furnaces, processing of metals, n.e.s.” implies that there

are also listed specific types of furnaces (see the numeric listing in the 505,651 and 652 series). A commodity code relating to an n.e.s. description should only be used once you are certain that a specific code and description for the goods to be cleared does not exist.

The basis for accurate coding of commodities in trade is to identify the goods in terms of the structure of the CITC, which is different from that of the Customs Tariff. This is especially important in the case of parts. Thus a repair part of an electric motor installed on a piece of farm machinery is to be coded as parts of electric motors, not as part of the farm machine itself. Automotive rubber weatherstripping not cut-to-length is to be coded as rubber weatherstripping, not as a motor vehicle part.

**TWO
CHANGES IN
CODING
PROCEDURE**

Packaging — Special procedures should be followed in applying the 7-digit commodity code to import packaging. There are two different categories of packaging in use, and the procedure to be followed will depend on the nature of the packaging. They are:

1. Import packaging which is *reusable*. All such packaging is listed separately at the end of the introduction on page 10, together with the appropriate 7-digit code to be used. In all cases the first three digits for reusable packaging will be in the 950 series.
2. Import packaging which is *not reusable*. There are some packing charges which are included in the costs of the goods, but shown separately on the Form B3. For these, select the appropriate commodity code for the goods in question, and inscribe on the B3 the first five digits only of the commodity code selected, with the final two digits in all cases of this kind to be 01.

Goods Returning After Export — All goods such as contractors' equipment and tools, survey equipment, construction and logging machinery, which are returned to Canada within five years of export, and entered under tariff items 7090501 and 7091001, should be assigned the applicable commodity code.

These new directions for coding procedure, which differ from those given in the Commodity Index, come into effect at once.

**SOURCES
OF HELP**

1. *Commodity Code* — Where importers are unable to locate a commodity description and numeric code which will properly describe their goods, please write — Chief, Commodity Intelligence Section, External Trade Division, Statistics Canada, Ottawa K1A 0V5 — or Telephone (613) 996-2900, or Telex 053-3585.
2. *Tariff Items* — Please contact your local Customs Office.

Reusable Packaging

Barrels and drums, metal, repeat shippers	950-19-30	No.	10

Grain, Flour, Meal and Cereal Preparations

061	Cereals, unmilled	8
062	Cereals, milled	8
064	Bakery products	9
066	Other cereal products	9
069	Other farinaceous substances	9

Fruits and Fruit Preparations

071	Fruits and berries, fresh or chilled	9
072	Fruits and berries, frozen	10
073	Fruits, dried or dehydrated	10
074	Fruit juices, unfermented, not concentrated	11
075	Fruit juice concentrates	11
076	Fruits, preserved, not canned	11
078	Fruits and products, canned (except infant foods)	12

Nuts, Except Oil Nuts

081	Nuts for food, not shelled	12
082	Nuts, kernels and seeds for food, shelled or prepared	12

Vegetables and Vegetable Preparations

091	Vegetables, fresh or chilled	13
092	Vegetables, frozen	14
093	Vegetables, dried	14
094	Vegetables, preserved, not canned	14
095	Vegetables and vegetable juices, canned (except infant foods)	15
099	Pickles, sauces and dressings	15

Group Code		Page in Numeric Listing
Sugar and Sugar Preparations		
101	Sugar, molasses and syrups	15
104	Sugar preparations and confectionery	16
Cocoa, Coffee, Tea and Spices		
111	Cocoa and chocolate	16
112	Coffee	16
113	Tea	17
114	Spices, spice herbs and spice seeds	17
117	Vinegar	17
120	Margarine, Shortening and Lard	17
Miscellaneous Foods, Food Materials and Food Preparations		
141	Soups, except infant soups	17
142	Infant and junior foods	17
143	Pre-cooked frozen food preparations	17
144	Materials for food preparations	17
146	Other food preparations	18
Fodder and Feed, Except Unmilled Cereals		
153	Oil seed cake and meal	18
155	Other feeds of vegetable origin	18
156	Feeds of animal origin	19
157	Complete feeds and feed concentrates	19

Group Code		Page in Numeric Listing
Beverages		
171	Non-alcoholic beverages	19
172	Fermented alcoholic beverages	19
173	Distilled alcoholic beverages	20
Tobacco		
181	Tobacco, unmanufactured, unstemmed	20
182	Tobacco, unmanufactured, stemmed	20
183	Tobacco, manufactured	21
Crude Animal Products, Inedible, Except Fibres		
201	Raw hides and skins, except fur skins	21
202	Fur skins, undressed	21
205	Feathers, quills, bristles and human hair	22
209	Other crude animal products, except fibres	22
Crude Vegetable Products, Inedible, Except Tobacco Fibres and Wood		
211	Seeds for sowing	23
212	Oil seeds, oil nuts and oil kernels	23
213	Nursery and greenhouse stock	23
216	Rubber and allied gums, natural	24
217	Other natural gums and resins	24
219	Other crude vegetable materials, inedible	24
Crude Wood Materials		
231	Logs, round and roughly squared	25
238	Other crude wood materials	25
